Cautionary Note Regarding Forward-Looking Statements

The information contained herein includes "forward-looking information" and "forward-looking statements" within the meaning of applicable Canadian and U.S. securities laws (collectively, "forward-looking statements") concerning the business, operations and financial performance of Gold Royalty Corp. ("GRC" or the "Company") and, in some instances, the business, mining operations and performance of GRC's counterparties and proposed counterparties. Forward-looking statements including but not limited to statements regarding the Company's outlook; other statements regarding expected future financial performance; the expectations of the operators of the projects underlying the royalty and stream interests, including their announced expected development and production timelines, milestones and schedules, expected future cash flows from the Company's royalties, the Vares Stream and other interests; expectations regarding the Company's growth and statements regarding the Company's plans and strategies. Such statements can be generally identified by the use of terms such as "may", "will", "expect", "intend", "believe", "plans", "anticipate" or similar terms. Forward-looking statements are based on the then current expectations, beliefs, assumptions, estimates and forecasts about GRC's business and the industry and markets in which it operates. Forward-looking statements are made based upon numerous assumptions and although the assumptions made by the Company in providing forward-looking statements are considered reasonable by management at the time, there can be no assurance that such assumptions will prove to be accurate. Forward-looking statements also involve known and unknown risks and uncertainties and other factors, which may cause actual results, performances and achievements of GRC to differ materially from any projections of results, performances and achievements, including, without limitation, any inability of the operators of the properties underlying the Company's royalty interests to execute proposed plans for such properties or to achieve planned development and production estimates and goals, risks related to the operators of the projects in which the Company holds interests, including the successful continuation of operations at such projects by those operators, risks related to exploration, development, permitting, infrastructure, operating or technical difficulties on any such projects, the influence of macroeconomic developments, commodities price volatility and other factors set forth in the Company's publicly filed documents with the Securities Exchange Commission (the "SEC"), including the Company's Annual Report on Form 20-F for the year ended December 31, 2025 available at www.sec.gov and www.sedarplus.ca.

Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in the forward-looking statements, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking information and statements will prove to be accurate, as actual results and future events could differ materially from those anticipated, estimated or intended and even if events or results described in the forward-looking statements are realized or substantially realized, there can be no assurance that they will have the expected consequences to, or effects on, GRC. Accordingly, readers should not place undue reliance on forward-looking statements and are cautioned that actual outcomes may vary. Any forward looking statement speaks only as of the date on which it is made, reflects management's current beliefs based on current information and the Company undertakes no obligation to update or reissue forward-looking statements as a result of new information or events except as required by applicable securities laws.

Technical Information

Alastair Still, P.Geo., the Director of Technical Services of the Company, is a qualified person as such term is defined under National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101") and has reviewed and approved the scientific and technical information contained herein.

Disclosure relating to properties in which GRC holds royalty or other interests is based on information publicly disclosed by the owners or operators of such properties. The Company generally has limited or no access to the properties underlying its interests and is largely dependent on the disclosure of the operators of its interests and other publicly available information. The Company

generally has limited or no ability to verify such information. Although the Company does not have any knowledge that such information may not be accurate, there can be no assurance that such third-party information is complete or accurate. In addition, certain information publicly reported by operators may relate to a larger property than the area covered by the Company's interests, which often may only apply to a portion of the overall project area or applicable mineral resources or reserves. It cannot be assumed that all or any part of a measured, indicated or inferred resource will ever be upgraded to a higher category. "Inferred mineral resources" have a greater amount of uncertainty as to their existence and their economic and legal feasibility. Therefore, readers are cautioned not to assume that all or any part of the "inferred mineral resources" exist.

The technical and scientific disclosure referenced herein respecting certain projects has in certain cases been prepared by the owner under the 2012 Edition of the Australasian Code for Reporting of Exploration Results ("JORC"), which differs from the requirements under NI 43-101 and those of the U.S. Securities and Exchange Commission, including under subpart 1300 of Regulation S-K under the Securities Exchange Act of 1934 ("SK 1300"). Accordingly, the scientific and technical information contained or referenced herein may not be comparable to similar information prepared by entities under NI 43-101 or SK 1300, including in respect of mineral resources or reserves disclosed by such owners and operators.

Non-IFRS Measures

We have included, in this presentation, certain performance measures that do not have standardized meanings prescribed under International Financial Reporting Standards ("IFRS"), including: (i) Total Revenue, Land Agreement Proceeds and Interest, which is determined by adding land agreement proceeds credited against mineral properties and interest received on the Company's gold-linked loan; and (ii) GEOs, which are determined by dividing revenue by the average gold price for the applicable period. Each of these are non-IFRS measures.

The presentation of such non-IFRS measures is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. The Company presents such measures as it believes that certain investors use this information to evaluate the Company's performance in comparison to other royalty companies in the precious metals mining industry. Readers are advised that other companies may calculate such measures differently. The presentation of these non-IFRS measures is intended to provide additional information and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with IFRS. For additional information, including a numerical reconciliation of such non-IFRS measures, readers should refer to the section titled "Non-IFRS Measures" in Item 5 of the Company's Annual Report on Form 20-F for the year ended December 31, 2025, which is incorporated by reference herein and available under the Company's profile at www.sedarplus.ca.

Four Unique Pillars of Growth

Driving Gold Royalty's Acquisitions to Date

Flexible Growth Options Allow Gold Royalty to Pivot Growth Strategy to Suit the Environment – Today This Means Prioritizing Cash Flowing Assets (While Continuing to Generate Early-Stage Royalties Internally at Low Cost)

Royalty Financing

- Providing royalty or stream financing to fund project development.
- Consideration is typically cash.
- Contingent or deferred payments can de-risk investments.

Third Party Acquisitions

- Acquiring royalties from third parties such as mining companies or prospectors.
- Consideration can be a mix of cash and stock.

Corporate M&A

- Corporate mergers and acquisitions can benefit both sets of shareholders through increased scale, lower costs of capital, and G&A synergies.
- Consideration can be a mix of cash and stock.

Royalty Generation

- Gold Royalty prospecting team generates royalties by vending assets to operators.
- Focus on Nevada and Quebec.
- Gold Royalty typically receives payments to generate these royalties rather than paying for them.

We Have Assembled a Tier 1 Portfolio of High-Quality Assets

Royalties on Three of North America's Largest Gold Mines

Gold Royalty Holds Royalties on Three of North America's Five Largest Gold Mines¹

REN (1.5% NSR and 3.5% NPI): Northern extension of Goldstrike (Carlin) – full production expected in 2027

Canadian Malartic and Odyssey (3.0% NSR, partial coverage): transition to underground with completion of shaft sinking mid 2027

Côte Gold (0.75% NSR, partial coverage): Canada's newest major gold mine. Installation of Vertimill could expand mill capacity to 42,000tpd (from 36,000tpd).

New Operators Prioritizing, Optimizing, and Recapitalizing Existing Operations

Borden (0.5% NSR, partial coverage): Discovery Silver acquired the Porcupine complex from Newmont on April 16, 2025

Vareš (100% copper stream): Operator Adriatic Metals acquired by DPM Metals on September 3, 2025

Pedra Branca (25% NSR gold, 2% NSR copper): CoreX Holding acquired the mine from BHP on April 2, 2026

¹ Per Capital IQ, September 2025

Our Large Portfolio Provides Numerous Exciting Catalysts

Near-term (< 1 year)

- **Borborema** – Studies to expand plant capacity from 2Mtpa to 4Mtpa to be completed Q2 2026¹
- **Granite Creek** – Feasibility study for Granite Creek underground Q2 2026²
- **Jerritt Canyon** – Prefeasibility level study on the mine restart to be completed Q4 2026; revised capital budget as part of its H2 guidance update planned for July 2026³
- **Odyssey** – Shaft #2 technical evaluation to be completed by year-end 2026⁴
- **South Railroad** – Full construction is expected to begin mid-2026 following receipt of final project permits⁵
- **Tonopah West** – Updated mineral resource estimate and updated PEA completed February 2026⁶
- **Vareš** – Expected to achieve 850,000 tpa operating rate by September 2026⁷; paste backfill plant completed Q3 2026⁸

Medium-term (< 2 years)

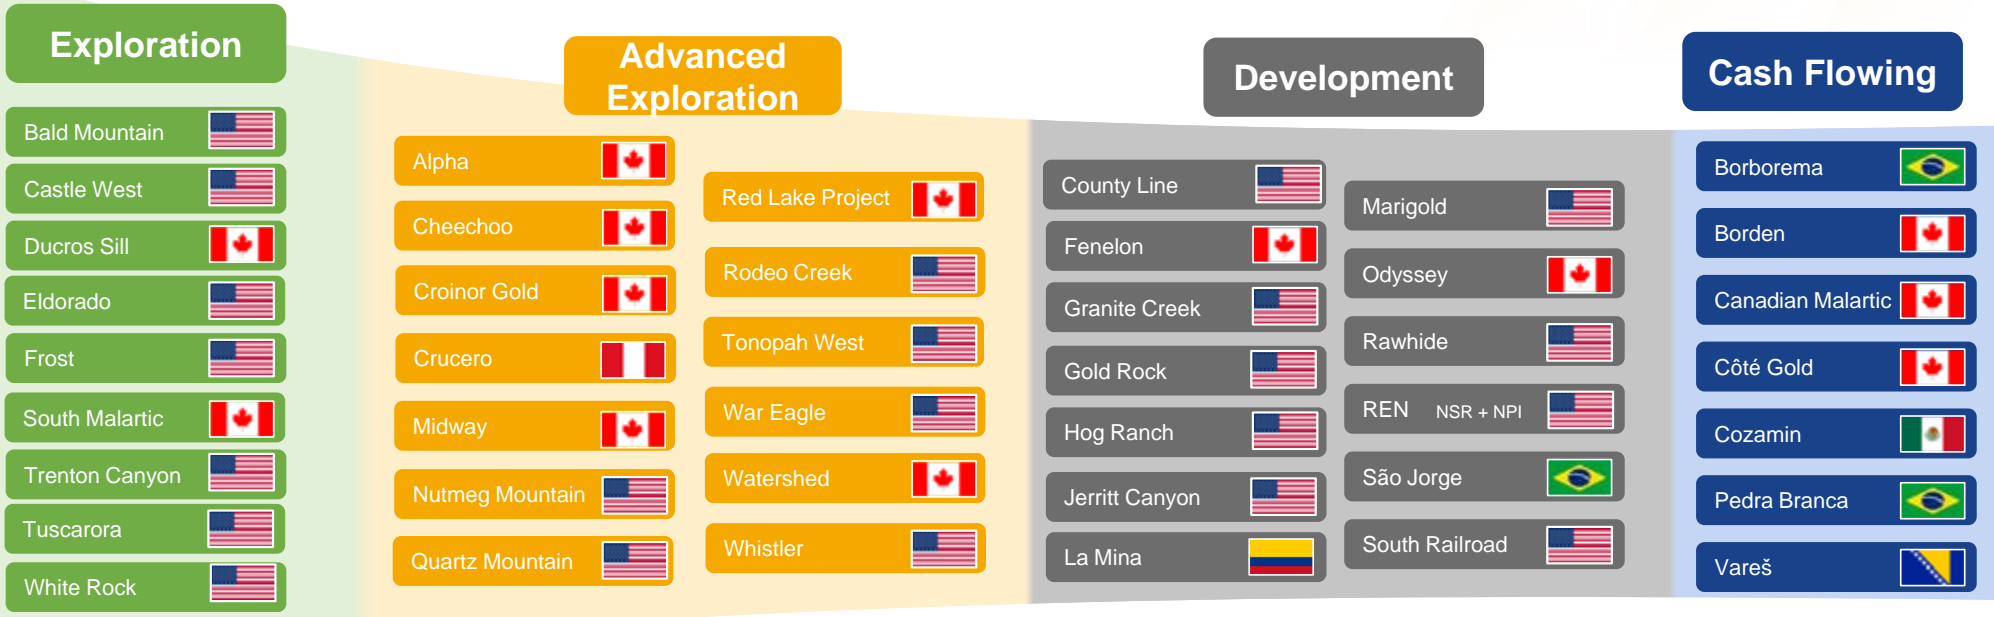

- **Borborema** – Highway realignment to increase LOM by 2Moz gold⁹
- **Borden** – Discovery to upgrade haulage fleet, improve ground support, and increase ventilation levels. Dome Mill return to full capacity by 2027 or sooner¹⁰
- **Côté** – Installation of additional Vertimill in early 2027¹¹
- **Granite Creek** – PFS / Feasibility study for Granite Creek open pit¹²
- **Jerritt Canyon** – Production to start H2 2027¹³
- **Odyssey** – Initial production via Shaft #1 in Q2 2027¹⁴
- **Ren** – Expected to achieve production run rate of 140,000 ounces gold per year in 2027¹⁵
- **Tonopah West** – Receipt of necessary permits and construction on an exploration decline to start 2027¹⁶

Long-term (> 2 years)

- **Granite Creek** – Open pit start production¹⁷
- **Odyssey** – Shaft #1 extension to final depth in 2031. Production from a second shaft potentially beginning 2033¹⁸
- **South Railroad** – Initial production expected in early 2028¹⁹
- **Tonopah West** – First production expected ~2029-2030²⁰

Why Invest in Gold Royalty?

FREE CASH FLOW INFLECTION

- **Positive free cash flow** first achieved in Q2/25; poised for strong growth
- **Strengthened balance sheet**; net debt free as at December 31, 2025¹

LOW-RISK EXPOSURE TO GOLD

- **Cornerstone royalties on Tier 1 assets** operated by premier mining companies in low-risk jurisdictions
- **Limited capital cost inflation risk**: Our royalties/streams are fully paid with no additional capital calls or milestone payments
- **Limited operating cost inflation risk**: Most assets in our portfolio are NSR royalties which are calculated on net revenue

CATALYST-RICH GROWTH

- **Peer-leading expected growth**: Our five-year growth outlook is significantly stronger than other precious metals royalty / streamer peers
- **Low project execution risk**: Our five-year growth is largely comprised of assets which are already permitted and built, at least to a first phase
- **Long-term optionality**: A diversified portfolio of over 250 royalties/streams reduces dependence on any single asset; exploration spending by our operating partners contributes further upside to Gold Royalty's portfolio at no cost to us

Canadian Malartic & Odyssey

Asset and Royalty Overview

Coverage Summary

- Transitioning from the largest open-pit gold mine in Canada to the largest underground gold mine in Canada
- Mill expected to have ~40,000 tpd excess capacity starting in 2028, potential to fill excess capacity through near-mine targets and regional pipeline projects
- Potential for additional production from Odyssey Internal Zones 2026-2028

Canadian Malartic & Odyssey

Significant Resource Growth and Continued Exploration

Recent Updates

Mineral Resource Estimate¹:

- Over 1.3Moz added to the total resource of East Malartic relative to last year's total resource, with an increase of over 2.1Moz in Indicated Resources from increased conversion of Inferred Resources

Development²:

- Ramp development, shaft sinking activities and surface construction are on or ahead of schedule
- Shaft #1 reached a depth of 1,466 metres at Q4 2025; expected completion mid-2027. Shaft extension has been approved by 70 metres to a total depth of 1,870 metres.
- Agnico Eagle has outlined potential for a second shaft at Odyssey to aid in its "Fill the Mill" strategy. Shaft #2 could be in production 2033³.

Exploration²:

- Exploration at the Odyssey mine for 2025 consists of approximately \$29.7 million for 176,300 meters with the aim to continue conversion of Resources from Inferred to Indicated at the East Gouldie and Odyssey deposits, expanding the footprint of East Gouldie, and delineating the new Eclipse zone.
- An additional \$10.4 million is expected to be spent on 40,000 metres of exploration drilling into Barnat and East Gouldie mineralized corridors on the Canadian Malartic, Rand Malartic and Midway properties
